

# Innovative Scrubber Solutions, Inc. has the Know-how to improve your scrubber operation now!

**Innovative** is an engineering consultant....

**Innovative** is an equipment designer....

**Innovative** is a pollution control equipment manufacturer...

Yes, **Innovative Scrubber Solutions** is all of these things... and more. To address your issues we have to be.

Thirty-five years in the pollution control industry, including hundreds of installations and hands-on problem-solving has provided us with the knowledge to assist in improving your scrubber operation. Many scrubber installations have become obsolete because of code changes, have inadequate capacity, or are wearing out due to severe corrosion or erosion. **Innovative** provides services to correct these common situations.

**Innovative** offers "Complete Scrubber Service" that includes inspections, engineering studies or equipment engineered for your application. Our hands-on experience enables us to provide guidance, process knowledge and scrubber engineering for the development of a complete system including instrumentation, fan, pump, water treatment and other related equipment.

In short, **Innovative** studies the total scope of your application and then can design, manufacture and furnish the equipment, modifications or system best suited for your needs, meeting your needs of today and tomorrow.
